

Slimline Pro

There are two different models of the Slimline: the Slimline Pro 960 and 1260. They only differ in the bar lengths. The Slimline Pro 960 is suitable for the Schenk Easy and all M & R models- The Slimline Pro 1260 is suitable for the MHM S-Type and all popular Hebbecker models. It's the most innovative flash cure dryer. Simple operation and high drying capacity at a surprisingly affordable price! The Slimline Pro perfectly complements manual hand printing carousels because of its universal applications.

Slimline SE

The Slimline SE is the latest model of Schnell Industries (now trocknerbau.de). This flash cure dryer convinces by a surprisingly low price, but the difference to its predecessors is that the control is not digital but analog. It's very easy to use and has a high drying capacity. Slimline SE is constructed entirely in aluminum.

Technical Data

output power	12,2kW
rated input voltage	380V/50Hz
power consumption	17,7A
automatic timer	0-13 sec.
automatic power control	10-100% power
control	manuell/sensor (Pro – MHM compatible)
drying surface	690 x 500mm
emitters	quartz tube emitters
fans	230 V/50Hz/0,14 A
fuses	3x20 A
dimensions	960 (or 1260)x500x260mm
heating surface	680x500x72mm
weight	12,9 kg (with rack = 25kg)
