

# Vantage SE

The **Vantage SE** is a midwave dryer, special designed for MHM S-Type printers but it's not only usable for this type of printers. This flash cure dryer is the only midwave dryer worldwide, which is complete made of aluminium. That's why, he is a light-weight of his class. To remove the Vantage SE with only one person and replace it into the machine is absolute easy. Additional to normal functions, the Vantage SE has special features, which makes him a "must have" for every screenprinter.

## Technical Data
